KITCHENS & BATHS

A DIVISION OF SCHULER SERVICE, INC.

SCHULER KITCHENS & BATHS PROCESS

Our easy start-to-finish process for your full kitchen or bathroom remodeling project involves three appointments as preparation for the renovation:

1 INITIAL CONSULTATION APPOINTMENT

This takes place in our well-furnished kitchen and bath showroom. During this appointment, we'll discuss your project, budget and timeframe. To help us better understand what you have in mind, photos and inspirations are welcome. We will discuss everything from cabinets and surfaces to fixtures and flooring. At the conclusion of this meeting the designer will schedule your in-home measuring appointment.

2 IN-HOME MEASURING APPOINTMENT

For this appointment, our designer will come to your home to take accurate measurements of the project space, analyze construction details, and take photos. This step will help gather what is needed to create a proposal which may include a 3-D design to be presented at your next appointment.

3 DESIGN PRESENTATION APPOINTMENT

This exciting appointment provides you with an opportunity to see your ideas come to life! Your designer will reveal the design and discuss the details of the entire project including material selections within a range to fit your predetermined budget.
